PROPOSITION 65
STATEMENT OF CONFORMITY

Proposition 65 requires businesses to provide warnings to Californians about significant exposures to chemicals that cause cancer, birth defects or other reproductive harm. These chemicals can be in the products that Californians purchase, in their homes or workplaces, or that are released into the environment. By requiring that this information be provided, Proposition 65 enables Californians to make informed decisions about their exposures to these chemicals.

Proposition 65 also prohibits California businesses from knowingly discharging significant amounts of listed chemicals into sources of drinking water.

Proposition 65 requires California to publish a list of chemicals known to cause cancer, birth defects or other reproductive harm. This list, which must be updated at least once a year, has grown to include approximately 900 chemicals since it was first published in 1987.

Proposition 65 became law in November 1986, when California voters approved it by a 63-37 percent margin. The official name of Proposition 65 is the Safe Drinking Water and Toxic Enforcement Act of 1986.

Carclo Optics is committed to comply with regulatory compliance efforts and continues to monitor potential safety, health, and environmental impact of our products. We work with our suppliers to monitor impact on chemicals, preparations and articles supplied to us that are used to make our products that will meet California Proposition 65 standards.

Carclo Optics hereby declares that their entire range of injection moulded Optical Products and packaging do not contain any of the latest OEHHA listed substances or are within the safe limits, if one has been adopted, and do not require a California Proposition 65 warning label. This statement is based on the current list of Proposition 65 as of the 3rd of January 2025.

For and on behalf of
Carclo Optics Limited.
